

WATCHING THE FIRMAMENT

OBJECTIVES (only the observation)

Offer to different groups the opportunity of discovering the National Park of El Teide, taking advantage of the particular conditions in the afternoon, when less people visit the place, and at the same time taking advantage of our firmament at night.

- ❑ The proposal must be adequate in order to keep the quality of our services as a whole.
- ❑ The services will be exclusive and never interfered or interrupted by other groups.
- ❑ Handing astronomical charts as well as other useful information.
- ❑ Watching the firmament, in those fixed places, in order to understand some aspects related to position at night and other general elements. We will try to deal with the perception that different cultures had about the firmament and the relation between History and Astronomy in a didactic and pleasant way.
- ❑ Special emphasis on the Canarian aborigine culture (Guanches).

With appropriate time, number of people, etc. The visit could be completed with the usage of other technical means (previous agreement) such as telescopes, binoculars, slides, transparencies, etc.

Carrying out this activity takes about 40 or 45 minutes

Customers will be able to keep contact with us via e-mail in order to go deeply into Astronomy (without additional cost). Therefore, our e-mail will be included in the astronomical charts (where you can also see our logo).

TECHNICAL ELEMENTS

Depending on what is demanded, the following could be available:

1. Halogen floodlights and green laser to point out the stars.
2. Retro-projector and video-projector
3. Suitable music, microphone, loudspeakers, etc.
4. Software to make astronomical charts
5. Observing is easier by naked eye since the usage of technical means would take more time.

STAFF

Our staff is actually qualified in relation to the objectives which are proposed. Our staff has undertaken several courses which guarantee our professionalism during more than ten years. We have worked with enterprises such as: Freebird (Jeep Tour), Travelplán, Viajes Insular, Iberojet, Club Vacaciones, Viajes Mencey, Viaconte, Paradores de Turismo, etc...
